

**BOS-LAP 6201**

LAPPING OIL

**Description**

Bosse Lubricants® BOS-LAP 6201 Lapping Oil is a blend of high quality, low viscosity oils used in grinding and polishing operations. Abrasive particles are kept in a colloidal suspension without clumping or damming which assures a consistently smooth and uniform finish.

Bosse Lubricants® BOS-LAP 6201 Lapping Oil also helps to cool and lubricate the surface being finished, and provides for the continuous removal of residue as it is removed.

Lapping Oil is an important element of the lapping process. It assists the cutting function of abrasive grains and enhances the operation of the machine. It forms a film on the lap plate holding the abrasive in suspension during the lapping process.

**Typical Characteristics**

Appearance:	Light Clear Liquid
Odor:	Mild Hydrocarbon
Flash Point, °F:	>120
Soluble in Water:	Not-Soluble
Chlorine:	No
Sulfur, Active:	No
