

Technical Data Sheet

RustSafe™ 2400

Product Description

RustSafe 2400 Corrosion Inhibitor is a solvent based, water displacing corrosion inhibitor designed to rapidly separate from typical water based solutions used in machining operations or cleaning systems. RustSafe 2400 leaves a dry, ultra-thin film capable of protecting all metal surfaces for over 60 days even when stored outdoors or in high humidity environments.

Features and Benefits

- Non-Staining
- Ultra-Thin Film
- Non-Emulsifying
- Easily Cleaned
- Water Displacing
- Dry to the Touch

Properties

Odor	Mild
Specific Gravity (25 °C)	0.81

Equipment

Suitable for use in a variety of cleaning equipment, including dip tank systems and mechanically agitated immersion tanks.

Process

1. Add RustSafe 2400 to the tank reservoir at full concentration
2. Immerse parts in RustSafe 2400 for 1-2 minutes or until the parts are adequately covered.
3. After the immersion process, allow the parts to drip dry up to 8 hours. Drying can be accelerated using a high pressure air stream.
4. Periodically check the drainage tap near the bottom of your tank reservoir for water accumulation. If necessary, remove any water present and replenish the tank with RustSafe 2400.

Disposal/Safety

Disposal

Vantage recommends contacting your current or local environmental service company for proper disposal.

Safety

Please see Safety Data Sheet for further information.

Packaging

Available in 33 lb (15 kg) pail and 370 lb (169 kg) drums

Shelf Life

36 months when stored in original, sealed container above 50°F (10°C).
